

- **All Clear System® is focused on:**

- Safety of the employees
- Mitigating Risk – to the Institution and the Directors
- Compliance with Safety and Security Regulations
- Fewer employees / longer hours / new security challenges / new pressures on customer security

- **Safe Entry**

- Access to the system through hand held devices or smartphone apps
- Time based events for opening each facility
- Distress codes to alert employees of potential problems
- Removes the obvious signals being used today.
- With the optional security system interface – can indicate the status of the alarm system; prevent employees from entering when the alarm has been tripped.

- **Safe Exit**

- To ensure employees have reached a safe location as they exit the facility

- **Travel to a location**

- Monitors to ensure an employee reaches the designated location by the time specified

- **Notifications**

- User controlled notifications (email,text,voice) of events
 - Clear code not entered in time
 - Distress code entered
 - Employee does not reach safe location
 - Employee does not reach destination
- You control who is notified for each location

- **Audit & Reporting / Dashboard**

- Real time status of each facility and the employees in that facility
- Detailed information on every event within the system
- Ability to perform detailed historical analysis

- **Night Deposit System**

- Allow your customers to use the system to verify their employees have successfully made their deposits
- Notifications will be sent to the customer of events
