

Time to replace: Verint NetDVR-II with a Verint EdgeVR™

NetDVR-II was first released in 2005 – end of support is 12/31/2015

After that date, Verint will no longer be patching or providing tech support on the NetDVR-II hardware. Upgrade to avoid Potential Vulnerabilities.

Verint EdgeVR supports High-Definition IP cameras

Today, if you combine all the analog cameras in a typical branch the total number of pixels is about half of what a smartphone provides. Join the future and leverage high-definition IP cameras to better serve customers, your community and your employees.

Don't get caught without video evidence

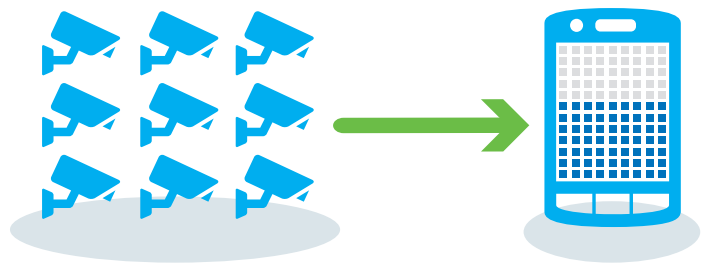

The hard drives in a NetDVR-II travel ~1/2 million miles every year – they are well past their recommended lifespan.

Integrated Fraud Investigation and Analytics Tools

Verint EdgeVR solutions enable fraud transaction investigations and face recognition of fraudsters across all sites. This makes it easy to search and identify patterns of suspicious activity. Advanced Fraud Tools are unavailable on the NetDVR-II.

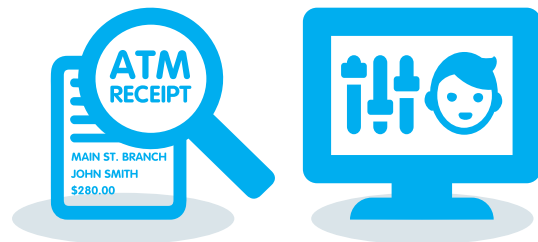

Upgrade to Verint EdgeVR™ 300

If you combine all the analog cameras in a typical branch the total number of pixels is about half of what a smartphone provides
